Bushing Bump Neck Sizing Die

Precise case neck and shoulder resizing in one easy step!

With one simple step, the **Bushing Bump Neck Sizing Die** allows you to resize your case neck's outside diameter and headspace length.

This neck reduction/bump shoulder operation keeps your case neck in better alignment with the case's center line.

Partial neck length resizing can assist in alignment, because the unsized section of the neck better aligns a previously fire-formed cartridge in the rifle chamber.

After Sizing

View exaggerated for clarity

Absolute precision for the world's most demanding shooter – YOU.

Developed with input from some of the world's most discriminating reloaders, Forster's exclusive design is unique. This Die is easy to adjust and use. Best of all, it prevents overworking the necks and allows you to control the amount of neck tension for your bullet seating operation.

Forster Products gives you choices

We've already "done the math!"

Order a **Bushing Bump Neck Sizing Die Kit** by caliber and we include three bushings most likely needed to produce accurate ammunition with proper neck/bullet tension. (See ordering chart on reverse.)

Prefer calling your own shots? Get exactly what you want.

If you are making cartridges for a tight-chambered rifle you may need smaller bushings. Alternatively, you may need larger bushings if you are not outside neck turning and are using Lapua or Norma cases with thick-neck walls. (See ordering chart.)

We offer you flexibility.

We manufacture over 90 bushing sizes (in .001" increments) which are available separately. Just order by inside diameter desired. For example, order number BUSH-230 is a bushing with an inside dimension of .230" (See our website for details.)

Straight shooters.

Improves accuracy and extends case life

Forster Products' **Bushing Bump Neck Sizing Die** and its bushings enable brass to be sized with a minimum of working... with just the right amount of neck tension.

When you order the Bushing Bump Neck Sizing Die Kit you get:

- A top-quality, hand-polished Forster Die to match the caliber of your gun. It's compatible with any standard 7/8–14 thread reloading press.
- Three pre-selected, standard-size bushings, machined to a “smooth as silk” interior finish.

Caliber	Bushings Bump Neck Sizing Die Kit (Die with 3 Pre-selected Bushings)		Bushing Bump Neck Sizing Die Only

WARRANTY

All Forster Products are warranted against defects in materials and workmanship for the life of the product. Parts which, by nature of their function, are subject to normal wear (such as springs, pins, etc.) and parts which have been altered, abused or neglected, are excluded from the warranty. If the product is deemed defective by workmanship or materials, it will be repaired, reconditioned or replaced (at Forster's option). This warranty supersedes all other warranties for Forster Products whether written or oral.
